PROJECTS

UP-Swachhta-Mitra ↗ | React.js,Tailwind CSS,MongoDB

jan 2025

- This project is a responsive web application built with React and Tailwind CSS. It focuses on clean design, fast performance, and a user-friendly experience. The site includes modular components and is deployed on Vercel for seamless access..
- [Live site here](#)

My Portfolio ↗ | HTML5,CSS3,React

jan 2025

- My portfolio website delivers a smooth and responsive user experience built using HTML, CSS, and React. It features a clean modern UI with fast-loading pages and carefully structured components. The design adapts to all screen sizes and offers seamless navigation across sections. Interactive elements, reusable components, and optimized layouts showcase my frontend development skills. The overall interface focuses on clarity, accessibility, and a polished visual experience..

Technologies/Frameworks: HTML5, CSS3, ReactJS, Redux, Linux, GitHub, Git, Mysql. Docker

EXTRACURRICULAR

Hackwithutarpradesh ↗

01/10/20025

Role

Lucknow

- I contributed as both a frontend developer and a DevOps member. I handled the UI development using modern frontend tools while also setting up deployment workflows and managing the project's technical infrastructure. This experience helped me work in a fast-paced environment, collaborate effectively with my team, and deliver a functional, user-focused solution.
- Participation Certificate. ↗

CERTIFICATIONS

- ReactJS & Redux - Udemy
- Complite Java- Udemy
- Command Line in Linux - Udemy
- UI/UX Desing ↗
- MongoDB Basics
- NodeJS with Express & MongoDB - Udemy
